PACKAGING & STORAGE

Available in:

- 40 lb bag (#5043)

Store in, dry place. Keep tightly closed and minimize exposure to air and moisture.

DIRECTIONS FOR USE

Arrival Formula: (Feed for 1-2 feedings)

- Mix 1.1 pounds of powder with hot (105°F-120°F) water to make 1 gallon of complete milk. Mix well until completely dissolved.
- Consult a nutritionist for actual batching.

Milk-fed Supplement:

Supplement 56 grams per calf per day for the first 2 to 3 weeks of life or during periods of stress. Divide equally among daily milk feedings.
