

BIO-GUARD

Protect your investment

Adding BIO-GUARD Silage Inoculant:

- Homofermentative
- Reduces silage shrink
- Improve Digestibility
- Ensures complete preservation
- Minimum of 100,000 CFU live, viable organisms per gram of treated silage

DIGESTION

PRESERVATION ENZYMES

A Proprietary Blend of Lactic Acid Producing Bacteria and Enzymes that Improve Digestibility

GUARANTEED ANALYSIS

Lactic Acid Producing Bacteria (min)... 9.1×10^{10} colony forming units (*Pediococcus acidilactici*, *Lactobacillus plantarum*, *Lactococcus lactis*, *Enterococcus faecium*)

- Equivalent to 100,000 colony forming units per gram of silage.

PACKAGING & STORAGE

Available in:

- 500 gram Mylar foil bags (#1001)

Store in a cool, dry place for short-term storage. Keep tightly closed. Long-term storage - store in a freezer. Shelf-life of 12 months in original packaging.

DIRECTIONS FOR USE

Mix 1 gram of inoculant to whatever volume of water is being applied to 1 ton of silage. One, 500 gram package treats 500 tons of silage.

INGREDIENTS

Anhydrous Dextrose, Dried *Pediococcus Acidilactici* Fermentation Product, Dried *Lactobacillus Plantarum* Fermentation Product, Dried *Lactococcus Lactis* Fermentation Product, Dried *Enterococcus Faecium* Fermentation Product, Dried *Trichoderma Longibrachiatum* Fermentation Product, Dried *Bacillus Licheniformis* Fermentation Product, and Silicon Dioxide
